

To update your dat files.

Ask someone who knows how, to help you the first few times until you are comfortable with how to do this and where you have access to save the file to. (ie server or the C drive of your computer)

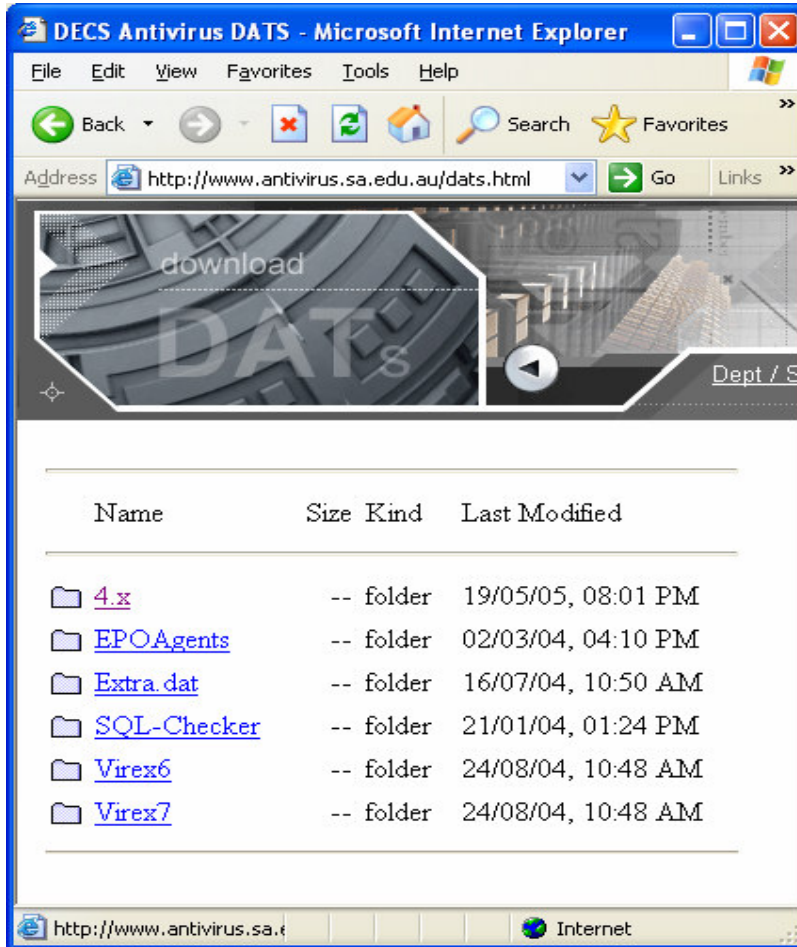

1. Go to www.antivirus.sa.edu.au

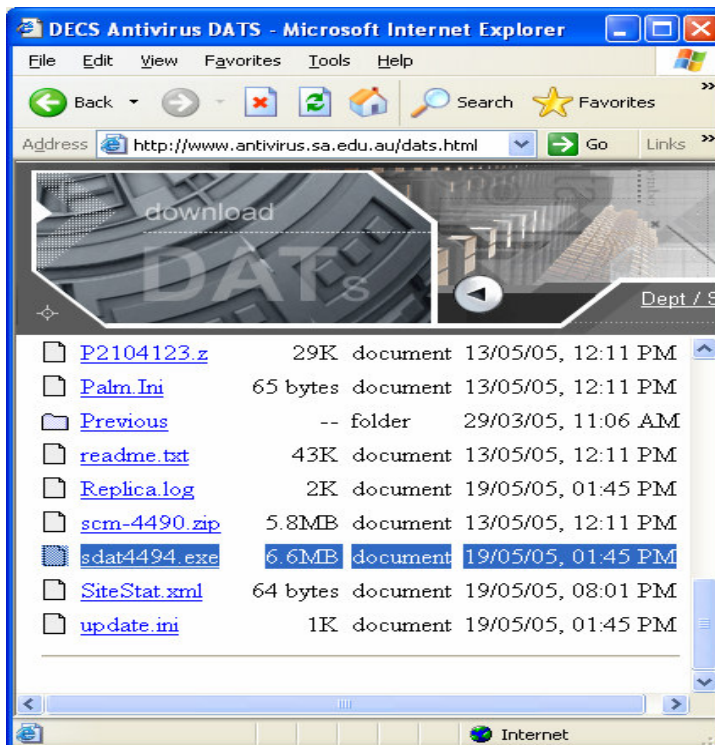

2. Click on “to download DAT files click here.”

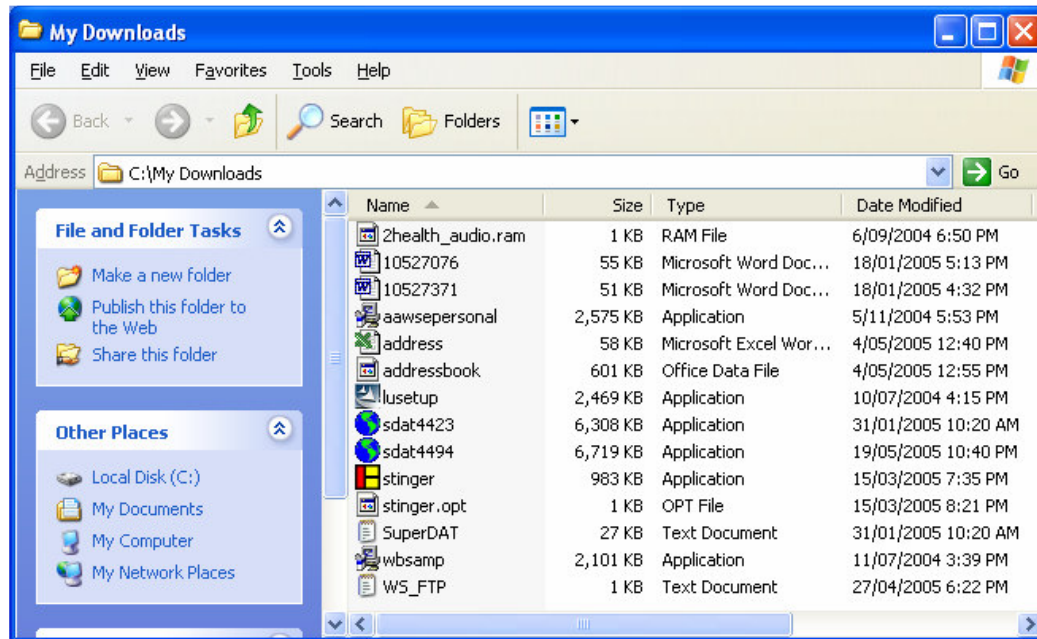

3. Click on “ Download DATS”

4. Click on “4.x” (Check the date of modification is later than your computer file was.)

□□□□ÿÿ□□□□□□□□□□ÿÿ□□□□□□□□□□ÿÿ□□□□□□□□□□□□□□□□

Sdat4494.exe

You will see the sdatxxxx file you downloaded.

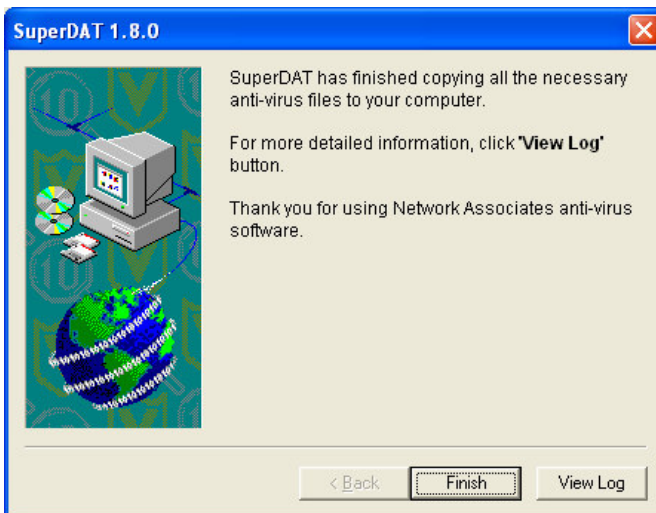

10. Double click on the file. You may get a security warning. Check you've clicked the right file and click run.

11. The wizard will open. Click Next

12. The file will be automatically installed. Click the finish button.

Again right click on the virus shield on the task bar (bottom right). Click About and you should now see the dat files with the current date and number.

Run your virus program as soon as you have time especially if your dat files were well out of date.
