FS MCAFEE 1

UPDATING MCAFEE VIRUS SCAN ENGINE 7.1.0 DATE: 2/11/03

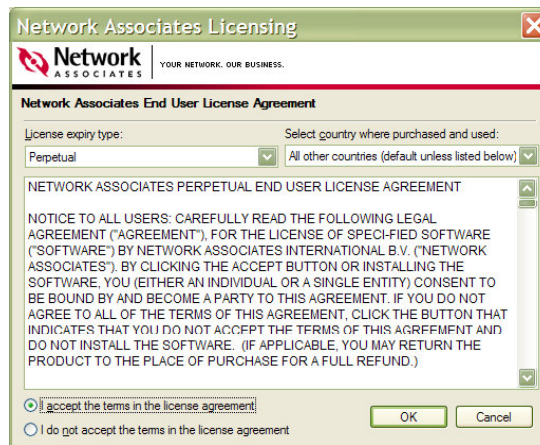

1. Download McAfee VirusScan Enterprise 7.1.0 from the DECS website. If you do not know the DECS staff username and password for the McAfee site, please either contact me or the CSC on 82041866

www.antivirus.sa.edu.au

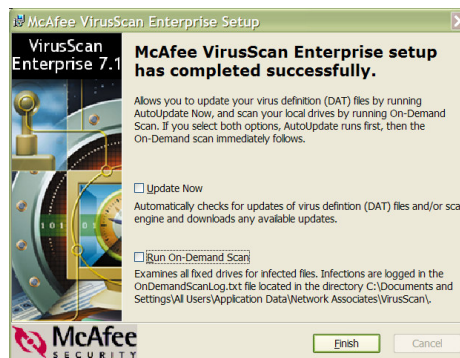

- a. Click on Department / School Link
 - b. Enter the username and password for the secured site
 - c. Click on the Products link
 - d. Scroll down to select Virus Scan Enterprise
 - e. Select [VSE710EN.zip](#)
 - f. Select the Save option and Save to a convenient location – where you will be able to access once the file is downloaded.
 - g. The downloading may take a while, it is a large file.
2. Double click on the file to extract and unzip to C:\windows\temp and click on Unzip.

3. Locate the C:\windows\temp\mcafee folder and double click on the Setup.exe icon
4. The McAfee wizard will start and prompt if required to remove the previous version of McAfee, click to remove the previous version.
5. Make the necessary adjustments to the License Screen – refer next page
“Perpetual” for DECS personnel and Accept the licensing agreement.

6. Select Typical installation and accept the installation location by clicking the Next button.
7. Click Install
8. Allow the installation Wizard to continue
9. At the Finish screen uncheck Update Now and Run On-Demand Scan

10. Click Finish
